Edward,

Could you verify if you searched seq id 407 & 408 from serial number 09/989,731 for Fozia. (see below) If you processed it, she would like to have it saved onto a disc and forward to her ASAP.

Thank you,  
Mary

Good Morning Mary,

09/989,728 is a new search request. You are right that Mr. Hart finished 09/989,731 on 20 April 2004. However, I would the results on a floppy disc. The track number for 09/989,731 is 119642. In the future, is it sufficient to submit these search requests directly to STIC and just indicate that the searches be saved on a disc?. thank you.

Hi Fozia,

Have you put in a request for the two sequences below? Our records show that a request was completed by Edward Hart for serial number 09/989731 on April 20, 2004. However, I can't determine which sequences were searched. Serial number 09/989728, there is no record as having received a request.

Are the two requests below, a new search?

Mary

Hi Ms. Hale,

I am examining cases that the first couple of hundred hits of the N-Genseq (rng) data base is Applicants'. I would like to request that the searches for these cases to be saved on a disc, rather than printing. If this is not a reasonable request, please guide me how to request searches in cases like that, because when these searches are printed, I miss art.

Please search SEQ ID NOs: 421 and 422 of 09/989,728 against commercial data bases and interference data bases. Please save the search on a disc.

Please search SEQ ID NOs: 407 and 408 of 09/989731 against commercial data bases and interference data bases. Please save the search on a disc.
